

A man and a woman are standing outdoors in a city street. The man is on the left, wearing a black short-sleeved polo shirt and dark grey trousers. The woman is on the right, wearing a bright pink short-sleeved polo shirt and dark blue jeans. They are both looking towards the camera with their hands in their pockets.

T-Shirt

COLLECTION

We've got a tee to suit any need. Find your favourite T-Shirt fabric: hearty 203 or 185 gsm and lighter 153 gsm 100% cotton in ultra-soft ring spun yarns cut in a modern Eurofit shape, classic cotton comfort in 203 gsm or 180 gsm weights, or our moisture-wicking 50/50 cotton/polyester blend. All durable, they come in amazing colours, and can handle just about any kind of decorating technique.

A photograph of a man and a woman standing outdoors. The man, on the left, has dark brown hair and is wearing a dark heather grey short-sleeved polo shirt. He is looking slightly to his right with a neutral expression. The woman, on the right, has long dark brown hair and is wearing a bright green short-sleeved polo shirt. She is looking off to the side with a thoughtful expression. They are standing in front of a brick building with some greenery in the background.

DECORATING TECHNIQUES

SCREEN PRINT

Screen printing (or silk screening) is a technique that uses stencils and ink to create designs on garments. It is the most economical method for producing large quantities that involve cotton or cotton-blend garments.

DIRECT TO GARMENT

A specialized inkjet printer applies inks directly to the garment, where the fibres absorb the ink to create a very durable design. It works well for short runs or full-colour printing on high stitch density garments.

EMBROIDERY

Embroidery is sewing a design, type or logo onto a garment with special thread. This technique gives garments a higher perceived value and works particularly well on heavier weight garments such as fleece.

With a wide selection of highly receptive fabrics and finishes, we have a style to fit your technique, whatever it is.

SUBLIMATION

Also called dye sublimation, this process uses heat-sensitive inks to create full-colour, photo-quality reproductions of digital images that last. Sublimation is well suited for 100% polyester garments.

HEAT TRANSFER

Heat transfer involves combining heat and pressure to transfer images to garments. This is a great option for detailed prints, customisation, shorter runs and quick turnaround times.

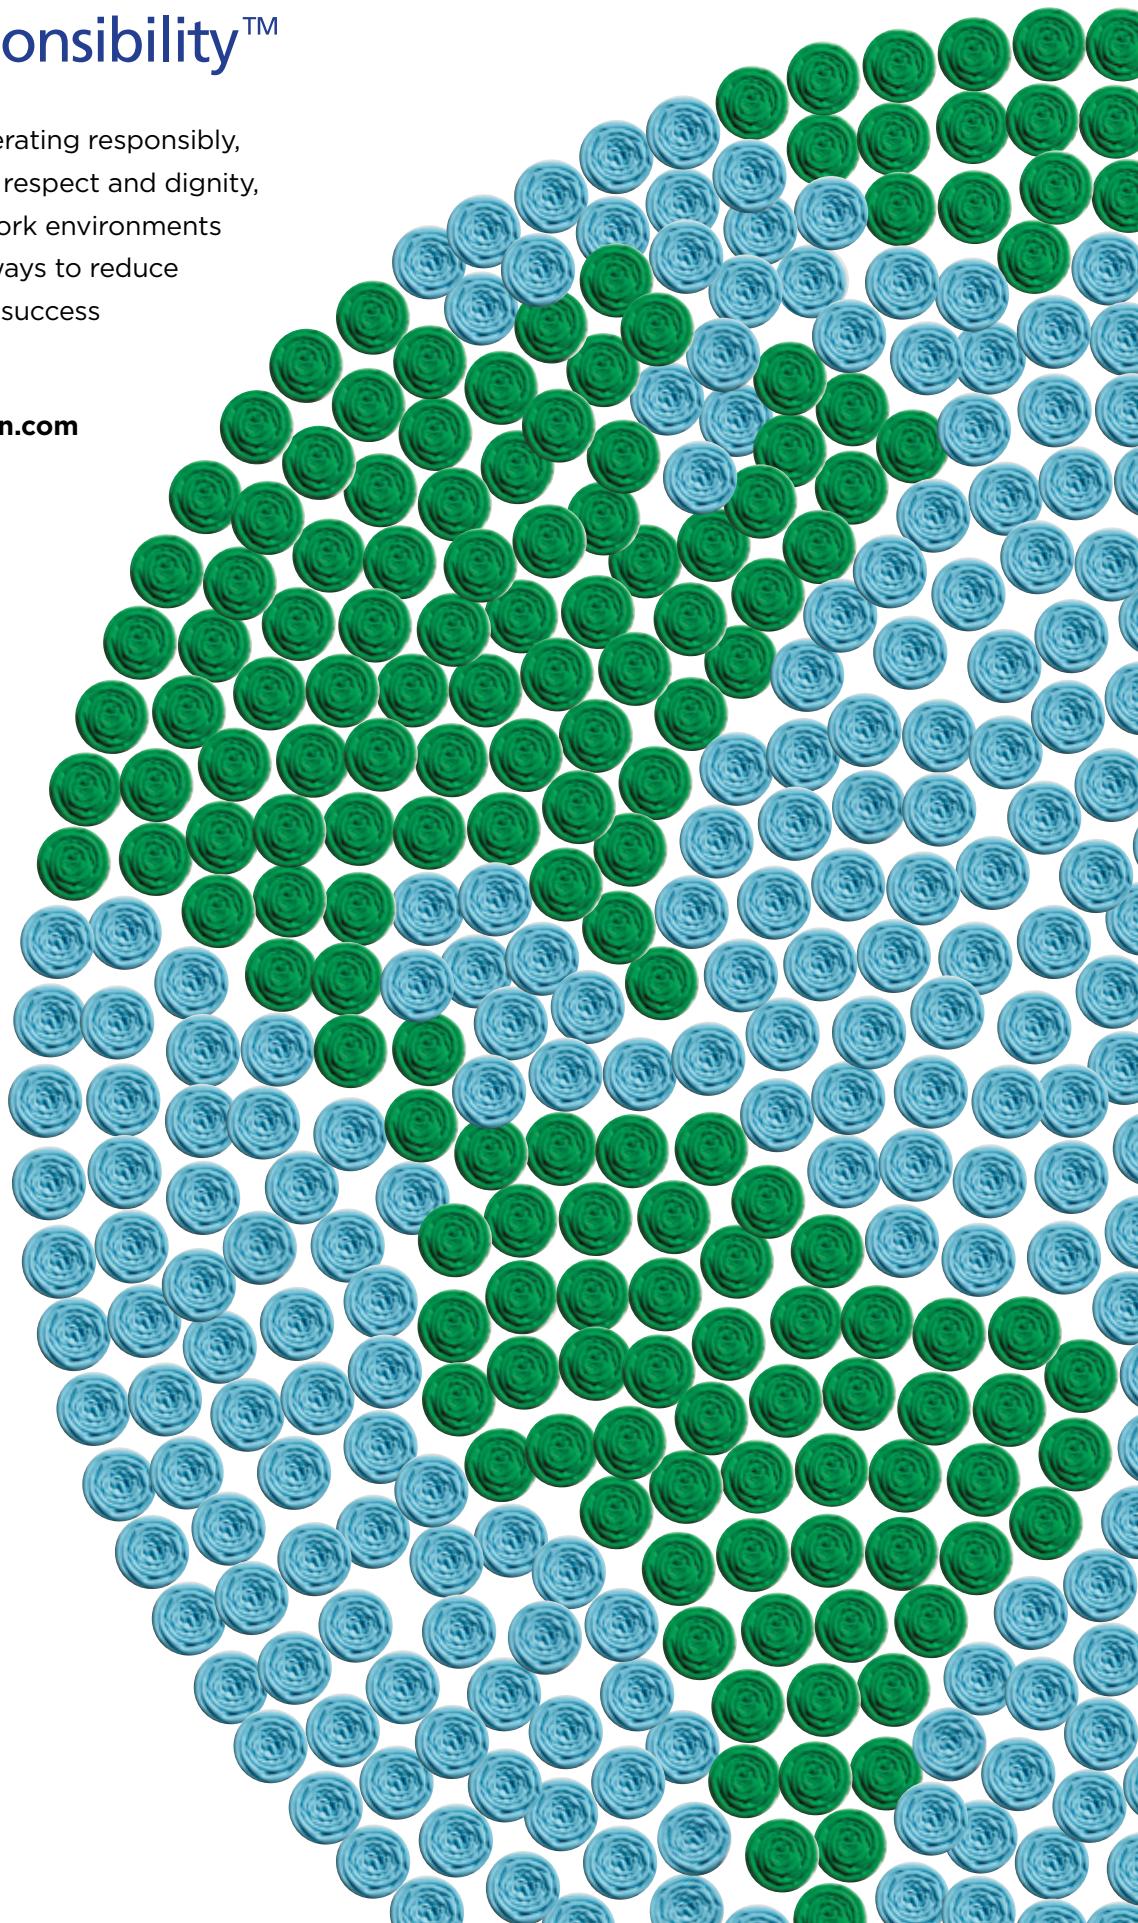

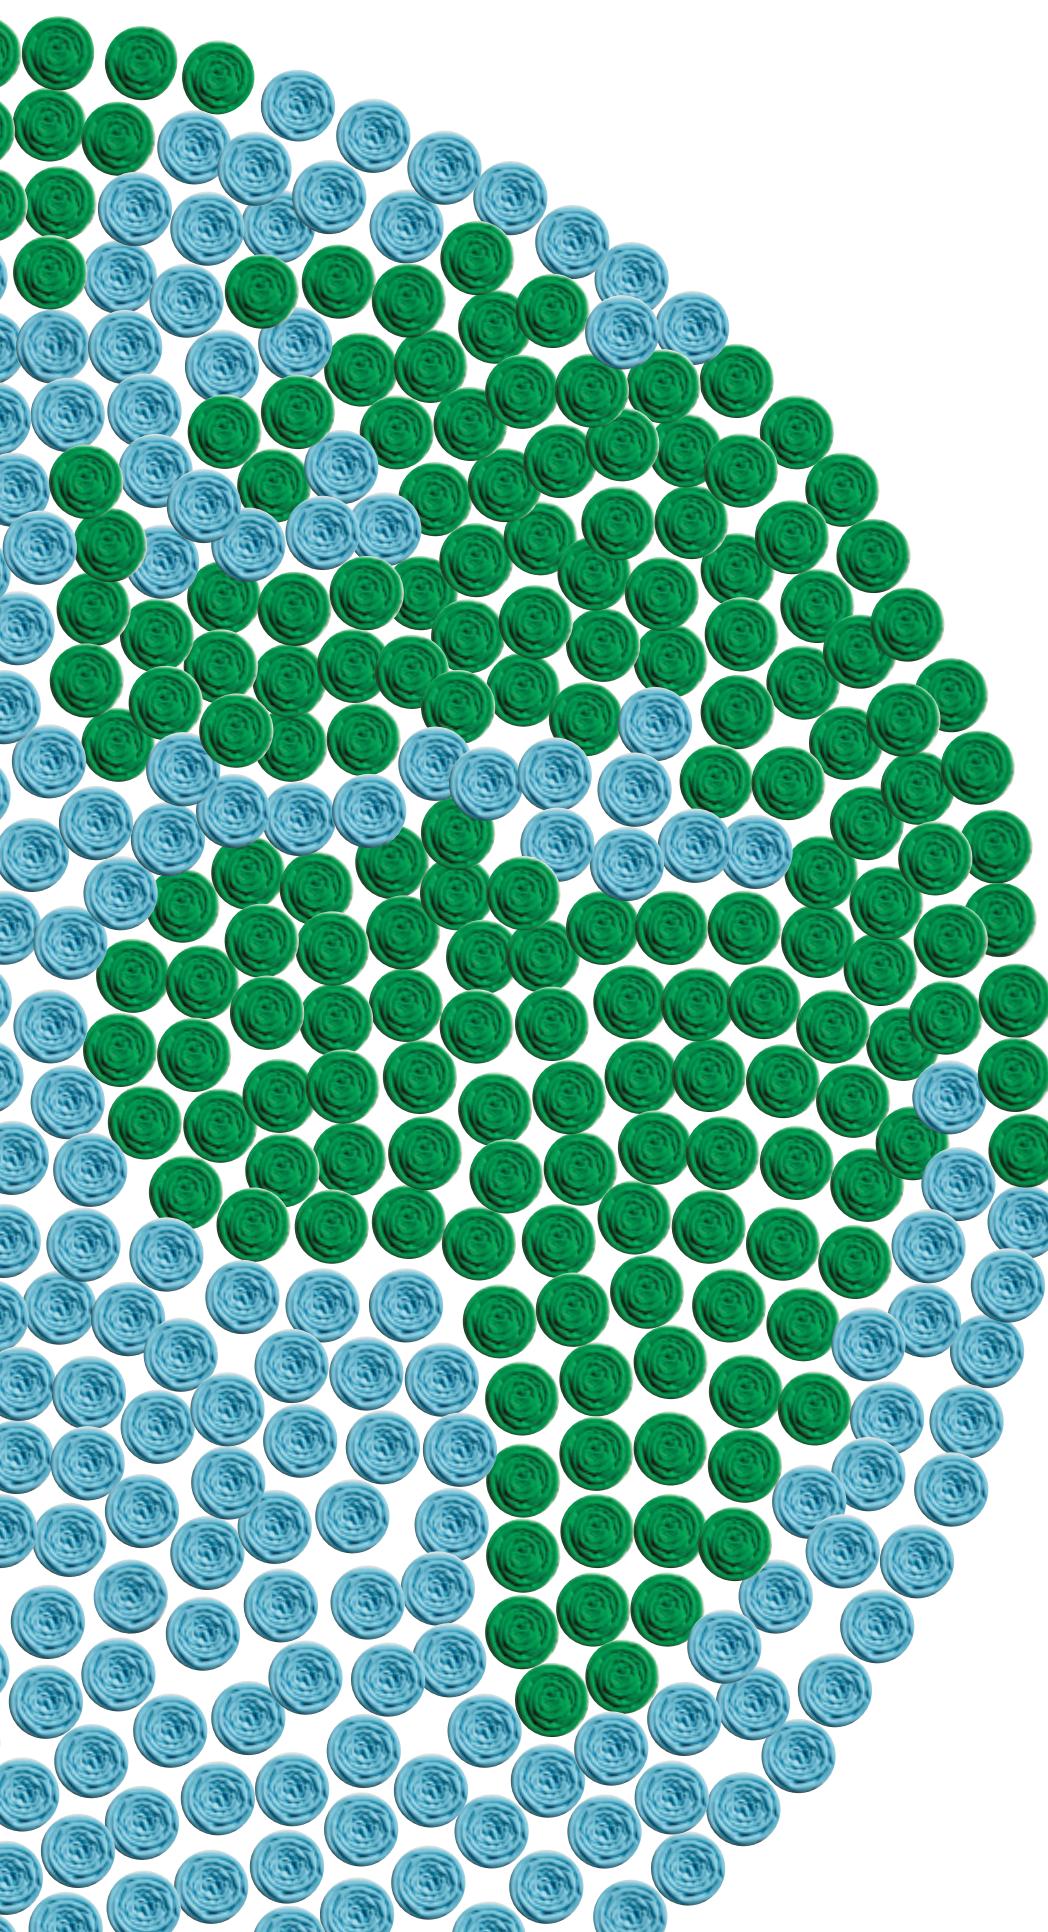

BUILDING A BETTER WORLD

Genuine Responsibility™

We strongly believe that operating responsibly, treating our employees with respect and dignity, providing safe and ethical work environments and continuously pursuing ways to reduce our impacts is critical to our success and future growth.
